

CAD IT is now at the head of a group that represents one of the Italian Information Technology sector's most dynamic organizations.

The Group provides services to the banking and insurance market, the business world and public administration and has been offering software solutions, maintenance activities, personalization, integration and other correlated services, from application management to outsourcing, consultancy and training, over 40 years.

Its success has led the Group to undertake an international expansion policy with customers in Germany, the United Kingdom, Switzerland, Luxembourg and the Czech Republic as well as to acquire in 2018 two leading Spanish companies, thus creating a new company, «Cad it España».

CAD IT is the leader in the Italian financial software market with its Finance Area application suite, the most commonly-used system at the majority of Italian banks and which completely manages financial instrument trading, settlement and administration (in any currency).

FINANCE

- Finance Area
- Corporate Actions
- Reconciliations
- OMS & STP Integration
- Trading Floor
- Risk & Compliance
- Cash & Liquidity management
- General Data

PUBLIC ADMINISTRATION

FE-Taxation for Authorities

E-COMMERCE**

GROUP

CAD IT Group is highly present in Italy with its own branches throughout the national territory.

It also boasts considerable presence on the international market with customers in Switzerland, Germany, the United Kingdom, the Czech Republic, Spain, Portugal and Austria.

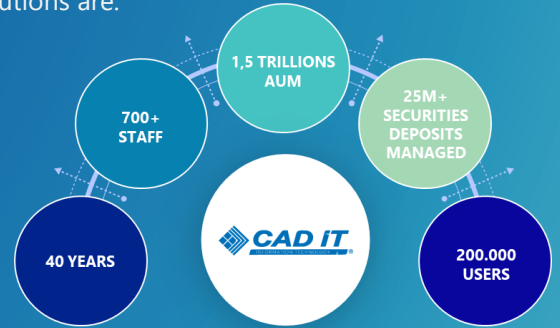

CAD IT's business is subdivided into three main Divisions: "Banks and Finance", "Public Administration" and "Industry".

Each Division develops software processes and programmes protected by international copyright law.

The services that CAD IT offers to accompany its own software solutions are:

- Application Performance Management
- User Experience Design
- Test Management
- Project Management
- Business Process Mapping
- Java Application Design & Development
- Web & Mobile Design & Development
- System Integrator
- Application Management
- Consulting

CAD IT's approach, developed during forty years of experience, is entirely based on satisfying the needs of its clientele. Guidelines, checks and specific tools guarantee the qualitative control of every aspect linked to defining needs and the design, release and support of our solutions and all connected services.

CAD IT's "Lego" methodology is to develop software from a base of standard granular components (Lego) in order to build tailor-made technological solutions to perfectly meet the customer's needs.

CAD IT provides software and services to high-standing companies throughout the European market. Our customers include bank groups, public authorities, local authorities, firms, insurance companies, funds, outsourcing service suppliers and foundations.
